Trever T. Hines

Education

2012–present **PhD candidate Geophysics (certificate in Computational Engineering)**
University of Michigan, Ann Arbor, MI

2008-2012 **BS Geology**, *University of Illinois*, Urbana-Champaign, IL

Doctoral Dissertation

Title Transient deformation in tectonically active regions and implications for viscoelasticity in the crust and upper mantle

Advisor Eric Hetland

Description
- Developed algorithms to detect spatially and temporally coherent features in large geodetic data sets
- Introduced novel techniques to infer the geophysical processes causing observable ground deformation

Teaching Experience

2014–2016 **Graduate student instructor**, *University of Michigan*
- Instructed labs for a graduate level course on data analysis and inverse theory
- Topics included statistical hypothesis testing, Bayesian inference, regression, cluster analysis, and Kalman filtering

2015 **Michigan Math and Science Scholars instructor**, *University of Michigan*
- Co-taught a summer course for high school students on the mathematics of natural hazards

Proficiencies

Analysis
- Supervised machine learning with stochastic processes and radial basis functions
- Kalman filtering for real-time data integration
- Linear and nonlinear optimization techniques
- Numerical methods for solving partial differential equations

Programming Python, Cython, MATLAB, R, Bash, LaTeX
